### Sigma FP With Manual Focus Lenses - everything you need to know

A lot of people are interested to use the Sigma FP with adapted manual focus lenses. In this video I highlighted the things I've learnt and researched from using the camera with M mount lenses thoroughly. This video was shot with a Lumix G9 on C-AF and the camera failed to lock focus at times resulting in wobbly focus. I apologise for this and will fix it for the next video. :) Follow me on Instagram: [instagram.com/whenareyougoinghome](https://www.instagram.com/whenareyougoinghome) [instagram.com/speedy.fifty](https://www.instagram.com/speedy.fifty) Kipon adapter with Helicoid [bhphotovideo.com/c/product/1455266-REG/kipon\\_1\\_m\\_sl\\_m\\_adapter.html](https://bhphotovideo.com/c/product/1455266-REG/kipon_1_m_sl_m_adapter.html) Novoflex adapter: [bhphotovideo.com/c/product/1103369-REG/novoflex\\_let\\_lem\\_lens\\_mount\\_adapter.html](https://bhphotovideo.com/c/product/1103369-REG/novoflex_let_lem_lens_mount_adapter.html)

### BEST BUDGET MANUAL VINTAGE LENS FOR SONY a7iii | SIGMA MINI WIDE MACRO REVIEW

#a7iii #sigma #vintagelens My name is TOBEN BENEMERITO, owner of Chasing Nomadic Thrills apparel brand, Filipino Amateur content creator at your service Hermanos! Though my channel is not up there yet, I hope to deliver in the future product reviews, tutorials, travel vlogs and some tips and tricks on how to manage living in Germany as a foreigner from Philippines. If you have not subscribed to my channel yet, please do so and I really appreciate it. Thank you and peace out! Instagram: [instagram.com/toben.bene/](https://www.instagram.com/toben.bene/) FB Page: [facebook.com/Toben.Bene/](https://www.facebook.com/Toben.Bene/) I bought this lens few years ago but since I have a new camera body I wanted to test this lens again. For a 20euro, this 28mm little guy can really deliver good results in filming. Hope you enjoy my content and please do not forget to subscribe. ### Best lens for narrative filmmaking - Sigma 18-35 f/1.8

The Sigma 18-35 is essentially three prime lenses in one, you get a full frame 24mm, 35mm, and 50mm look when paired with a speedbooster. If you decide to go further with a non boosted adapter you essentially get a 35mm, 50mm, and 70mm look. When you take into account how sharp this lens performs as well as its decent shallow depth of field, this is truly the only lens you would need to shoot an entire narrative film with. ### SIGMA 24-35mm f2 ART Lens Review | Such a SHARP lens!

#SIGMA2435 #SIGMA lens #PanasonicGH5 CORRECTION: ART lenses are indeed not focus by wire at all. They are using an HSM which is a MECHANICAL system. This would make sense why I don't lose my mind when manually focusing these lenses Today we are talking about the SIGMA 24-35mm f2 ART series lens. We are talking about if this is a lens you should own for your GH5. Is it better than the great 18-35mm?! Let's find out! ### The setting I use on my Sigma 150 to 600 mm lens

This week's video is about the setting on my Sigma zoom 150 to 600 mm lens. I was asked a few days ago, what setting I use on my lens. I have never been asked that before, so I decided to make a video about. I have never though much about the setting I have on my lens there are only four but after reading the manual I began to understand that there is more to the lens then I was thinking. I hope that you enjoy the video. ### CLEAN Portraits with MANUAL settings (easy) feat. the Sigma 56mm 1.4

CLEAN Portraits with MANUAL settings (easy) In this video I explain how I set my camera up to shoot nice, clean portraits using manual settings. The best part is that all the settings remain the same except for one, which makes for nice easy shooting. 0:39 Camera Settings 5:58 Example Shoot 8:31 Lightroom Walkthrough After I've explained the settings I then head outside in real-time with Tia, take a quick few snaps, then bring them back into Lightroom so that you can see the full process from start to finish. I found it a huge step once i started shooting in Manual mode compared to an auto/priority mode because you can really start to take control of the images coming out of your camera, as opposed to letting the camera guess what it thinks is best. The shots are taken on the Sony A6500 & Sigma 56mm 1.4 lens in the example shoot however this technique will apply to any other camera system. Hopefully it comes in useful -if it does go ahead and smash that like button! (That's what all the cool kids say isn't it?) ### TUTORIAL | SIGMA Lens Focusing problem on Manual & Auto Mode for NIKON & CANON DSLR Cameras

SIGMA makes amazing lenses and has very high quality control standards. Several of our customers returned lenses and complained that their lens was not focusing, assuming that the lens is defective. Don't worry. The lens is perfect. In many cases lenses ship from the factory set to Manual Mode. You need to change that setting to Auto Focus. Check out this video to learn more about how to set up manual and autofocus on a Sigma lens. Visit our Amazon Storefront: amzn.to/2ir03F1 #CommissionsEarned Compatibilities: Remember that this procedure could be used for most of the DSLR cameras like Canon 60D, 70D, 6D, 7D, 7D MarkII, 5D Mark III, Rebel series & Nikon models: D7100, D7000, D5200 and more. \*\*\*\*\* We are a participant in the Amazon Services LLC Associates Program, an affiliate advertising program designed to provide a means for us to earn fees by linking to Amazon.com and affiliated sites.
